

## RIO AMMUNITION

### Rio Competition Target Loads

Rio 12 gauge Target Loads bring unsurpassed performance to the competition range. Combining their own clean burning single-based powder with the perfectly matched wad and primer means excellent velocities, moderate pressures and smooth recoil. You will consistently get dense and compact shot patterns for optimal target breaks whether your discipline is skeet, trap, sporting clays or FITASC. Available in 3/4 oz., 7/8 oz., 1 oz., and 1-1/8 oz. payloads.

STOCK#	DESCRIPTION	GAUGE	LENGTH	DRAM	VELOCITY	SHOT SIZE

TLSK24	Target Load Skeet 24	12	2 3/4	Max	1,315	9

### Rio Star Team Loads

The Star Team line of ammunition from Rio is specifically designed for competition shooters. These 12-gauge loads come in three varieties – the Star Team 24, 28, and 32 – and they are capable of achieving muzzle velocities of up to 1,360 feet per second.

If you are in need of a high-quality competition target load, look no further than the Star Team line of ammunition from Rio. These shells feature a clean-burning single-based powder as well as a well-matched wad and primer – this combination of features ensures smooth recoil, moderate pressure, and high muzzle velocities.

STOCK#	DESCRIPTION	GAUGE	LENGTH	DRAM	VELOCITY	SHOT SIZE
<b>1 1/8 Ounce</b>

## RIO AMMUNITION

### Rio Elite Target Loads

A specially-designed wad and shot-cushioning cork base mean superior patterning with Rio's cutting-edge Elite Target Loads. Developed with the competitive shooter in mind, Elite's unique wad and cork base reduce fliers and give denser, more consistent patterns. 7/8 oz., 1 oz., and 1-1/8 oz. loads in speeds from 1150 fps all the way to 1350 fps. Look for the blue shell with the high nickel base. Go ahead, Pop a Cork. You deserve it!

<b>36 Gauge (.410) 1/2 oz.</b>						
RC36	Target Steel	36 (.410)	2 1/2	2 3/4	1,200	7.5, 8, 9

### Rio Pigeon/ZZ Loads (Live Bird)

Live Pigeon Shoots are an activity which places greater ballistic demands on ammunition, thus it is necessary to have a specialized line of products which has been tested on the firing ranges. Our products are delivered to you after a long period of development and adaptation to the needs of the marksman. Each component of these shotshells has been carefully studied in order to offer the market a product of high quality and reliability.

The CSB 2 ESPECIAL powder used has been specially designed to develop a highly progressive combustion thanks to the gradual liberation of the gases and gives the shotshells a high velocity at long distance.

These shotshells are being used with great success in all the live pigeon competitions – both with pigeon and ZZ Birds – and they have obtained resounding international victories thanks to their high residual velocity which is capable of hitting the target with absolute certitude within the defined area.

STOCK#	DESCRIPTION	GAUGE	LENGTH	DRAM	VELOCITY	SHOT SIZE
